SUMMARY

Experienced Senior DevOps Engineer with over 4+ years of expertise in automating CI/CD pipelines and optimizing deployment processes. Proficient in leveraging tools like Git, Maven, Jenkins, Ansible, Docker, Kubernetes, Terraform, Prometheus, Grafana, SonarQube, JFrog Artifactory, Helm, and AWS Cloud to enhance scalability and ensure high availability for enterprise applications. Skilled in streamlining operations for AWS production environments, reducing deployment time, and improving system performance.

CORE COMPETENCIES & SKILLS:

Version Control: Git, GitHub

Build & Deployment Tools: Maven, Jenkins

Containerization & Orchestration: Docker, Kubernetes, Helm

Infrastructure Automation: Ansible, Terraform

Cloud Technologies: AWS (EC2, S3, VPC, IAM, CloudWatch, SNS, CloudFront, CloudFormation, Lambda, Snowball, Trusted Advisor, Elastic Beanstalk, EFS, Route 53 and SES)

Monitoring & Logging: Prometheus, Grafana, CloudWatch, SNS

Web & Application Servers: Tomcat, Apache HTTPD

Operating Systems: Linux (RedHat, CentOS, Ubuntu, Amazon Linux), Windows, Mac OS

Security: IAM, Kubernetes Secrets & Config Maps

Collaboration & Communication: Slack, Jira

Scripting Languages: Python, Shell Scripting

Networking Technologies: CCNA, JNCIA

Routing protocols: BGP, OSPF, VRRP, Static Routing, Default Routing

Network Security: VPN, IPSEC & NAT, ACLS

PROJECTS

NFU Mutual (National Farmers Union Insurance Society) [Link](#)

- Role: Senior DevOps Engineer

WORK EXPERIENCE

Senior DevOps Engineer

[Swift Solution Pvt Ltd](#)

Apr '22 — Present

Bengalore, India

Automated infrastructure provisioning and implemented a CI/CD pipeline for a UK-based insurance and financial services provider application, focusing on performance, scalability, and rapid deployment.

- Managed version control using Git, ensuring seamless collaboration and maintaining code integrity across teams.
- Configured Maven for dependency management and automated builds, optimizing artifact generation.
- **Infrastructure Automation:** Designed and implemented **CI/CD pipelines** using **Jenkins** to automate deployment and provisioning of infrastructure in cloud environments, improving deployment speed by 40% for Java applications.
- Simplified Kubernetes application releases, updates, and rollbacks by leveraging Helm charts.
- Implemented **configuration management** solutions using **Ansible** to automate the provisioning and configuration of infrastructure, reducing manual configuration tasks by 50%.
- Developed and managed **monitoring dashboards** using Grafana and Prometheus, improving visibility into system health and ensuring optimal performance of applications deployed on **AWS**.
- Worked closely with development teams to continuously improve CI/CD pipelines, facilitating smoother releases and addressing bottlenecks by automating infrastructure provisioning and testing.
- Spearheaded the use of cloud automation tools like terraform to ensure consistent infrastructure deployment, aligning with best practices for **infrastructure as Code**.
- Provided hands-on support for incident management, ensuring timely resolution of **production issues and collaborating** with teams to prevent recurring incidents, achieving a 20% improvement in system reliability.
- Managed incident response and troubleshooting for production systems, ensuring a **high uptime** of 99% and fast resolution of issues in collaboration with engineering teams, minimizing service interruptions
- Assignments + IQ + Scenario + Troubleshooting
- **Tools used:** Git, Maven, Jenkins, Ansible, Shell Scripting, Python, Docker, Kubernetes, Helm, Terraform, Tomcat, AWS (EC2, S3, VPC, IAM, CloudWatch, SNS), Prometheus, Grafana, SonarQube & JFrog.

DevOps Engineer

hyderabad, India

Personal Project:

End-to-End CI/CD Pipeline for Kubernetes Deployment | Technologies: Jenkins, Docker, Kubernetes, Helm, AWS, GitHub

- Developed a complete CI/CD pipeline for automated application deployment.
- Integrated source code management, build, testing, and deployment stages.
- Containerized applications using Docker and deployed to Kubernetes.
- Automated deployments using Helm charts and Jenkins pipelines.
- Reduced deployment time by over 80%.

EDUCATION

Bachelor in Commerce & Computer Science, Telangana Univesity (GPA: 6.9)

Jun '14 — Apr '17
Kamareddy, India

- Recognized for academic performance in Computer Science-related subjects despite a dual Commerce curriculum.

PERSONAL DETAILS

Languages: English, Hindi, Telugu
